

# Classroom

## by Apple

**System requirements:** iOS 12.0 or later | **Age:** K–20

---

Classroom turns iPad into a powerful teaching assistant, helping educators guide students through a lesson, see their progress, and keep them on track. With Classroom, teachers can easily launch the same app on every student iPad at the same time, or launch a different app for each group of students. Classroom helps teachers focus on teaching, so students can focus on learning.

---

### Key features

- Start, focus or pause student work.
- See what students see with Screen View.
- Share documents and links with the class using AirDrop.
- Share student work on the classroom's Apple TV.
- Easily reset forgotten passwords.
- Organise students using groups.

### Why the customer cares

- Classroom is a device management tool for teachers that supports their real-time classroom management needs.
- The app works seamlessly with Managed Apple IDs and Mobile Device Management (MDM) solutions, so setup is simple and works in both shared and one-to-one environments.

## Classroom Quick Demos

- Perform the demos of the key features below with two iPad Pro or iPad (6th generation) devices.
- Before getting started with these demos, make sure your devices are set up with one or more classes that each include multiple students. Make sure the teacher iPad has one or more Pages demo files that show in the Files app under Recents.

## Introducing Classroom

### Say this

- Today I'd like show you a new app for iPad called Classroom.
- With Classroom, teachers have several tools to guide learning in their classes.

### Do this

1. On the teacher iPad, tap to open Classroom.

### Say this

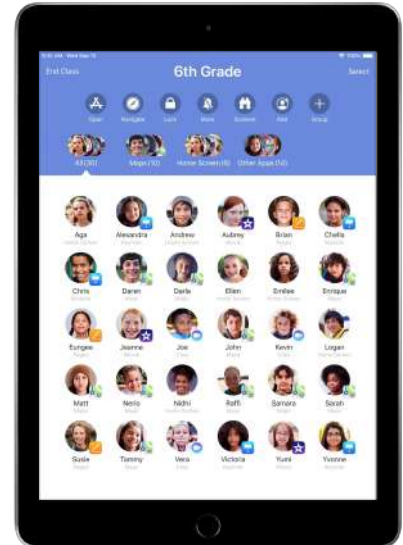

- Let's review the interface before I demonstrate how the app works.
- This first screen shows the classes that belong to me as the teacher, and I can easily switch between classes. These classes can be synced by the school's MDM server, or I can set them up manually without IT support.

### Do this

2. Tap any class to continue reviewing the interface.

### Say this

- **Top row:** The Select button allows the teacher to select a single student or a group of them. After selecting students, a teacher can perform any action in the actions list on devices in the classroom. With the End Class button, the teacher can end an active class session and review a class summary, which we'll get to later.
- **Actions list:** This row of icons represents the actions teachers can perform on devices in the classroom, which can be applied to a group of students or an individual student.
- **Groups:** This row shows groups of students. Teachers can see the "All students" group, manually created groups, and groups created dynamically when students use different apps. Dynamic groups are a great tool, allowing teachers to quickly see which apps students are using.
- **Students:** Here's where teachers can see each student and the current state of that student's device. It shows the student's Photo ID (if provided), the current app and the student's name. The teacher can also see important details like if the device is locked to the current app, if its battery is low or if AirPlay is active.

## Working with students

### Say this

- In this demo, I'm using one teacher iPad and one student iPad with classes I created manually.
- I'm going to tap the Smart Group at the top to select the current active students in my class.

### Do this

1. Tap a Smart Group, likely Home screen.

### Say this

- Teachers can open an app on all of their students' devices.
- They can even lock students into the app.
- This is a great way for teachers to start a project and keep everyone on task.

### Do this

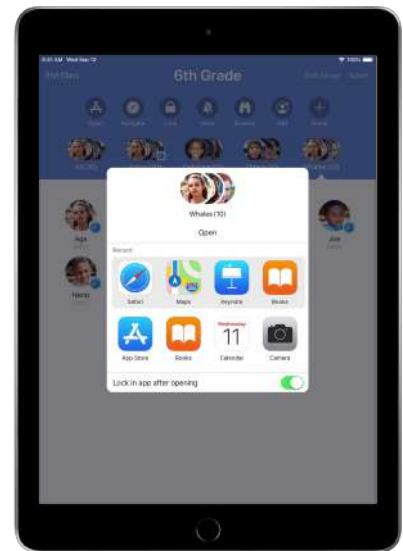

2. In Classroom, tap Open.
3. Tap to turn on the "Lock in app after opening" option.
4. Tap the Notes app.
5. Tap "Open Notes on this iPad".

### Say this

- After a teacher is done using the app in the lesson, the teacher can tap in the top-left corner to be quickly taken back to Classroom.
- Notice that the student information indicates that the students are locked into the Notes app.
- Tapping Unlock in the actions list immediately unlocks the student iPad from the Notes app, allowing them to return to the Home screen.

### Do this

6. Tap Classroom in the top-left corner.
7. Tap Unlock.

## Navigate

### Say this

- Next, let's look at Navigate.
- Navigate allows teachers to direct students to resources inside Books and the Safari web browser.
- A teacher can quickly take all of the students to a chapter in a book or to a website.
- Selecting Safari allows teachers to choose from their favourites.
- Let's take the students to apple.com.

### Do this

1. Tap Navigate.
2. Tap Safari, tap Favourites, tap Apple.
3. Tap Done.

## Locking and viewing screens

### Say this

- Earlier, we saw how we could lock a student's iPad to a specific app.
- Additionally, teachers can prevent students from using their iPad devices by locking the screen.

### Do this

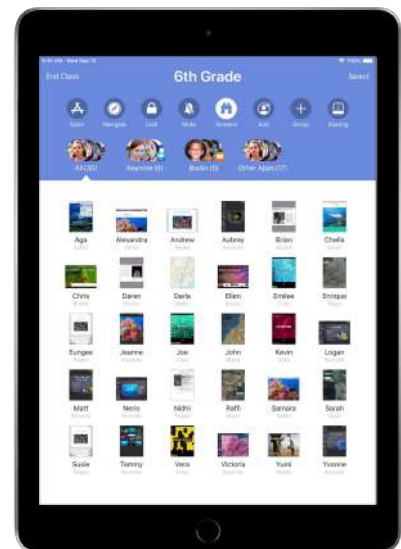

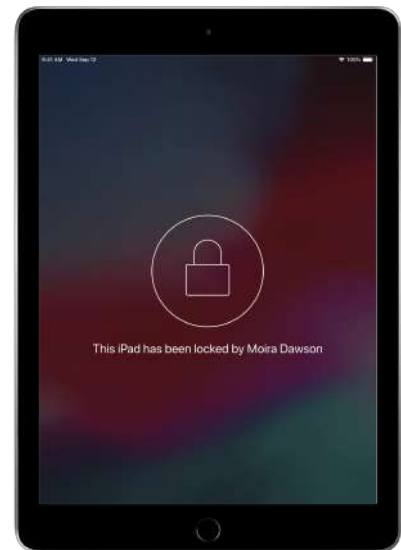

1. Tap Lock to lock the student iPad.
2. Tap Unlock to unlock the student iPad.

### Say this

- Next we'll look at Screens.
- When I tap the Screens button, each student's Photo ID is replaced with a preview of student's screens.
- Teachers can also see a student's screen in full screen.
- The Status bar on the student's iPad turns blue to indicate their screen is being viewed.

### Do this

3. Tap Screens.
4. Tap the logged-in student.
5. Tap View Screen, then tap Done.

## Sharing documents

### Say this

- Now let's share a document with the entire class.
- This feature makes it easy to share files such as worksheets, templates and presentations, or even photos and videos.
- The Files app in the dock provides quick access to my most recent documents.
- Dragging a document to a single student, a group or the entire class effortlessly shares a copy to students and prompts them to open it.

### Do this

1. Swipe up from the bottom of the screen to bring up the Dock.
2. Touch and hold the Files app to see recent documents.
3. Touch and hold a document, then drag it to the student group in Classroom.
4. Tap Accept on the student iPad.

### Say this

- When students have completed their work, they can easily share the content back to the teacher using the same Share workflow.
- The teacher receives a copy in the Classroom sharing menu, where they can view and save the file.

### Do this

5. On the student iPad, complete some sample work, such as adding a photo or editing the title.
6. Tap the More button (...) in the top-right corner.
7. Tap the Share icon.
8. Tap Teacher to share.
